PROFESSIONAL SUMMARY

PHP/Laravel Developer with 8+ years of experience building web applications, REST APIs, SaaS platforms, CRM systems, and business management solutions. Experienced in Laravel, Laravel Nova, MySQL, API integrations, AWS deployment, Git, and Redis. Proven track record of delivering scalable solutions for startups, agencies, and enterprise clients in remote environments.

> 5+ years of experience working remotely with international teams across the US, Australia, and Asia.

CORE TECHNOLOGIES

Backend	PHP 8 · Laravel · Laravel Nova · CodeIgniter · REST APIs
Data	MySQL · MSSQL · Redis
Frontend	JavaScript · TypeScript · React · Inertia.js · Vue.js · Next.js · Tailwind CSS · Bootstrap · jQuery · HTML5 / CSS3
Platform	AWS · Laravel Cloud · Git / GitLab · WordPress

WORK EXPERIENCE

PHP/Laravel Developer — Freelance

Aug 2023 — Present

Remote · Self-employed

- Own end-to-end Laravel delivery for international clients—REST APIs, Nova admin panels, and AWS/Linux deployment.
- Integrate payment, SMS, CRM, and fulfillment APIs; optimize queries and caching for responsive production workloads.
- Partner with distributed teams to ship features, manage releases, and resolve production issues remotely.

Fullstack PHP/Laravel Developer — IntraCode IT Solutions

Jan 2021 — Jan 2024

Remote

- Shipped full-stack Laravel products with custom REST APIs, admin dashboards, and complex MySQL data models for agency and enterprise clients.
- Owned third-party integrations and ongoing production support across multiple concurrent engagements.

PHP Developer — Fulfillment Ninjas / Afluent Consulting / 2KZ Consulting

Nov 2022 — May 2023

Remote

- Extended live e-commerce and order-fulfillment platforms in PHP, JavaScript, and Bootstrap.
- Integrated Konnektive/Sticky into checkout and fulfillment flows; delivered sprint work on aggressive timelines.

Mid-Level PHP Software Developer — RightValley Corp.

Jul 2022 — Oct 2022

Remote

- Built and maintained CodeIgniter applications on Microsoft SQL Server, including schema design and production bug fixes.
- Participated in weekly scrums to take features from requirements through release.

Outsource PHP Developer — Gleent Incorporated

Nov 2021 — Jun 2022

Remote

- Delivered new modules, REST endpoints, and third-party integrations across client Laravel and PHP codebases.

Design Engineer II — Tsukiden Global Solutions Inc. Jul 2021 — Apr 2022

Remote

- Implemented features and fixes across Laravel, Java Spring, and Python services in a multi-stack environment.
- Coordinated with QA and project management via GitLab and Jenkins to keep releases on schedule.

Web Developer — The Inspection Company Ltd. Jun 2019 — Jul 2021

Cabanatuan

- Maintained in-house Laravel applications plus Linux servers, backups, and direct technical support for staff.
- Built ChartJS reporting views and reliability improvements that supported daily business operations.

IT Assistant Programmer — Kasapi Microfinance and Rural Development Feb 2018 — Dec 2018

Talavera

- Developed organizational websites from scratch and handled server administration plus end-user IT support.

Web Designer — The Inspection Company Jun 2017 — Feb 2018

Cabanatuan

- Designed and built WordPress and custom PHP sites; managed hosting, backups, and server upkeep.

SELECTED PROJECTS

UpaHub — Property Management SaaS upa-hub.com

- Built a multi-tenant property management SaaS with Laravel 13, Inertia.js, and React 19 covering properties, leases, rent collection, front desk, maintenance, and accounting.
- Implemented company-scoped RBAC, automated rent invoicing with VAT handling, PayMongo (GCash/Maya) checkout, and a Sanctum REST API with scoped API keys.

Barangay Information System — LGU Platform bis.emiltamayo.com

- Built LGU management platform with Laravel API and Next.js frontend for residents, documents, blotter, and inventory.
- Implemented PDF generation, QR verification, multi-role RBAC, and English/Tagalog support.

HRIS — HR & Payroll Platform hris.emiltamayo.com

- Built a full-stack HR and payroll platform with Laravel, Inertia.js, and React for employee management, timekeeping, leave, loans, and recruitment.
- Implemented role-based access (Admin, HR, Employee), AWS Rekognition face audit, PDF payslips, and Laravel Cloud deployment.

EG EMR — Healthcare EMR/EHR emr.emiltamayo.com

- Developed electronic medical records platform with patient management and online appointment booking.
- Built QR-based appointment confirmation, public lookup, and secure role-based access (Admin, Doctor, Nurse, Patient).

Enpap4.0 Inc. — Corporate Platform enpap4.com

- Built a scalable web application from the ground up with front-end and back-end development.
- Handled database design, API integration, and deployment of a production-ready platform.
